git rebase 过程中可以使用git --abort/-continue来进行操作，成功之后如何撤销呢？

首先执行git reflog查看本地记录

```
chengde@chengde-ThinkPad-T470p:~/workspace/src/vision_algo$ git reflog
a3e5bed HEAD@{0}: checkout: moving from dev to chengde/add_ds5ir
49a0e2d HEAD@{1}: checkout: moving from chengde/add_ds5ir to dev
a3e5bed HEAD@{2}: rebase finished: returning to refs/heads/chengde/add_ds5ir

```

可知本次rebase之前的id 为:

```
1 | 02a3260 HEAD@{9}: commit: adjust ds5 ir data save file formate
```

所以执行

git reset --hard 02a3260 即可
